Quality Assurance / Quality Control:

High Quality products is one of our strongest advantages, manifested by keen focus on our clients' profitability when making all decisions. Our main objective is to provide our clients with maximum satisfaction. Some of our deliberations to achieve this are:

- Robust system of Quality Management system
- All company members are trained on the Quality system.
- Al Haremeen Oleochemicals QMS is adhered with ISCC system.
- Conducting pre-approval processes, for example, regardless of their distance from our network, to appraise and authenticate their production and quality control facilities.
- Careful evaluations of clients' normal need or special requests with a view to providing effective solutions.
- The handling of any claims from our clients with expediency to ensure minimum inconveniences.
- Providing regular upgraded price lists for our main products.
- Quick relaying of information regarding unusual or unexpected market tendencies to our clients.

<p>We are proud to be certified with ISCC certificate since Oct. 2021 # EU-ISCC-Cert-DE100-10876121</p>

Products we produce & Trade:

- UCOME: we produce biodiesel from used cooking oil (UCOME) that meets or exceed EN14214. Our Biodiesel made from UCO has CFPP between 0°C and +5°C the reduction of GHG emission between 85% and 95% compared to standard biofuels.
- FAME: we produce biodiesel from fatty acids (FAME) with specifications according to EN 14214.
- HVO : Hydrogenated Vegetable Oil
- Crude Glycerin: we produce crude glycerin as a by-product of our process with glycerol content between 60 and 80%.
- FAME blends – from Fatty Acid Methyl Esters such as the above

FeedStocks:

- UCO – Used Cooking Oil
- POME – Palm Oil Mill Effluent
- Animal Fats (e.g. Tallow)
- FAME Bottoms (Distillation Residues)
- Glycerol (Glycerine)
- Feed & Technical Products
- Fish Oil (pharmaceutical, food or feed grade)
- Lecithin
- Palm Acid Oil
- Other Fatty Acids & Acid Oils (technical or feed grade)
